FLIRTING WITH DEATH

Trampling on tracks and trains caused the death of 153 and the injury of 181 persons on the Southern railway system alone during the year 1929, according to its annual report.

Walking on tracks accounts for 117 deaths and 83 injuries, while stealing rides caused 36 deaths and 98 injuries. Among the victims were many school children. In a warning accompanying the report it said:

"Unauthorized use of railway property is simply flirting with death, with all the chances against the trespasser."

One of the strangest traits of human nature is that so many persons of intelligence will disregard every consideration of caution. And in spite of all the warnings which may be given the number of preventable accidents increases every year.

BABE RUTH'S SALARY

Recent news of Babe Ruth's signing a new contract with the Yankees for two years at \$80,000 a year is one of the most interesting items of the season in sport circles. Thus the famous slugger is granted a salary larger than that of the President of the United States.

His former contract was for three years at \$70,000 a year, a record figure for a baseball player until now. At various times there have been predictions that the Babe was slipping, but evidently the Yankee management does not think so.

Purely as a business proposition Ruth is no doubt worth the big salary he is to receive, for he is a tremendous drawing card for his team. But comparing his pay with that of the President it seems rather ridiculous.

However, maybe it's all right. There are quite a number of men in the United States who might hold down the President's job satisfactorily, while there is only one Babe Ruth.

Four New York City women were injured in a traffic accident. Wrong again. It was a runaway team of horses hitched to a laundry wagon.

FLIRTING WITH DEATH

Trampling on tracks and trains caused the death of 153 and the injury of 181 persons on the Southern railway system alone during the year 1929, according to its annual report.

Walking on tracks accounts for 117 deaths and 83 injuries, while stealing rides caused 36 deaths and 98 injuries. Among the victims were many school children. In a warning accompanying the report it said:

"Unauthorized use of railway property is simply flirting with death, with all the chances against the trespasser."

One of the strangest traits of human nature is that so many persons of intelligence will disregard every consideration of caution. And in spite of all the warnings which may be given the number of preventable accidents increases every year.
